

DATA SOLUTIONS

Repetitive processes, forms, and paperwork sap your energy and divert focus from core operations. MCS can keep you on track by automating data entry and storage tasks.

Work smarter,
not harder. Let
MCS automate
your operations!

We are specialists in creating tools, such as Smart Templates and customized applications, to streamline data entry, standardize format and storage of information for consistency, and facilitate reporting and distribution of data.

MCS SOLUTIONS FOR YOU

- ▲ Establish organizational methods to maintain related data of various types
- ▲ Create Smart forms and templates that verify data entry, standardization, and consistency
- ▲ Identify automated storage solutions for records
- ▲ Build data repository schemes for ease of record access, such as SharePoint sites and libraries
- ▲ Develop customized database applications that provide for multi-user entry, storage, and retrieval of critical data
- ▲ Perform data mapping to provide relational links among datasets in multiple locations
- ▲ Consult on existing systems to identify data relationships, reduce redundancy, and identify continuous improvements

MCS performs thorough staff interviews, reviews your current operations, develops a plan of action, and creates the perfect solution, tailored to fit your exact needs.

MCS assists with the integration of the solution and provides training and user manuals, as well as ongoing support for additional customization and maintenance.
